Success Story

Composting Conclusions

On February 6, 2006 an early morning fire south of Marble Rock in Floyd County caused the loss of nearly 1,500 hogs (feeder pigs and sows) housed in eight hog confinement buildings owned by Gary Rottler of Rottler Farms, Inc. Much of the building site was also destroyed.

Rottler immediately contacted the Iowa Department of Natural Resources including Area Resource Specialist Shelene Codner. In order to reduce the potential for groundwater contamination by burying the carcasses and to eliminate the need to landfill the mortalities, IDNR representatives recommended composting. Upon this recommendation, Codner contacted Bill Rowland of the Landfill of North Iowa to inquire about the availability of wood chips and mulch to be used in the establishment of the compost pile. Rottler obtained nearly 24 tons of wood chips and mulch to begin the onsite composting process. An existing onsite cement pad was used for establishment of the pile. After the pile was in place cleanup of the site began. Wood chips, mulch, straw and mortalities were placed on the pad and a straw bale berm was placed around the perimeter of the pile to prevent run-off and leaching.

After monitoring by both IDNR and Codner, the composting process is complete, data has been collected and the material has been land applied on an adjacent field that is currently being planted. "The composting appears to have been effective, states Rottler." I'm thankful that we were able to keep the carcasses out of the landfill, and pleased that we have gained a viable soil amendment for our crops. I am also pleased that by working with Eric Wiklund (IDNR, Field Office #2) and Shelly Codner (Area Resource Specialist) at least one positive thing has come from this horrible devastation, I appreciate their expertise and professionalism."

In addition to creating a high quality soil amendment, the overall project diverted approximately 40 tons of animal mortalities and 140 tons of steel from the landfill, resulting in a direct savings of \$7,200. "This is minimal to the overall loss, states Rottler, but it certainly does help." Data from the project can be obtained by emailing Shelene Codner at scodner@region12cog.org.

Wanted Materials

Copper Oxide
Diatomaceous Earth
(Land–Applications)
HVAC Equipment (useable)
Lumber (useable)
Nickel Oxide
Paint Powder
Zinc Oxide

Please contact
Shelly Codner for
information on any
the above materials.

Welcome!

The Iowa Waste Exchange welcomes Linda King as the newest member of the Financial and Business Assistance group. Linda will be working for the Iowa Department of Natural Resources' Energy and Waste Management Bureau and will be coordinating the Iowa Waste Exchange, providing technical assistance for the Pollution Prevention Intern Program and performing a host of other marketing related duties. Linda has a strong background in marketing and program development and has worked in this arena in a number of capacities. Linda may be contacted at (515) 281-4876 or via email at Linda.King@dnr.state.ia.us.
